Solution: Web App ComicCraft-Gemini

Flow:

- Input prompt in UI
- comic_service.py orchestrates
- gemini.py generates story script with dialogues
- image_generator.py generates images using HuggingFace
- layout_builder.py arranges 6-panel layout
- pdf_exporter.py creates final PDF
- static/panels stores images

Files from your screenshot: app/services/comic_service.py, gemini.py etc.
